CARRY

1 SUSPENSION
   + 3.5mm Lightwire
   + 6065 aluminum frame

2 SUPERULTRALIGHT AIRSPEED™ BACKPANEL
   + 3D-tensioned breathable mesh backpanel with side ventilation

3 EXOFORM™ HARNESS
   + Seamless layered mesh provides improved comfort and cushioning
   + 15 mm adjustable slide sternum strap with integrated safety whistle

4 EXOFORM™ HIPBELT
   + ErgoPull™ closure
   + Seamless layered mesh provides improved comfort and cushioning
## SIZING / FIT

### LEVITY - MEN’S SIZING
- **S** 16–19” / 40.6–48.3 cm
- **M** 18–21” / 45.7–53.3 cm
- **L** 20–23” / 50.8–58.4 cm

### LUMINA - WOMEN’S SIZING
- **WXS** 16–19” / 40.6–48.3 cm
- **WS** 18–21” / 45.7–53.3 cm
- **WM** 20–23” / 50.8–58.4 cm

### HARNESS SIZING
- **A** Completely loosen the pack’s hipbelt straps, harness straps and load lifters.
- **B** Load the pack with 10–20lbs/4–9kg of gear.
- **C** Put on the pack ensuring the hipbelt is centered and resting over the user’s hipbones. The hipbelt padding should sit half above and half below the hipbone. Buckle the hipbelt and tighten the hipbelt straps.
- **D** Tighten the shoulder harness straps by pulling them down and back. Adjust and buckle the sternum strap 2”/5cm below the collarbone. Tighten the load lifts to transfer the weight off of the shoulders.
- **E** Find the harness yoke or where the harness straps come together near the user’s neck. The yoke should be 2”/5cm below the C7 vertebra. The C7 vertebra can be located by tilting the head down and finding the bone that protrudes at the base of the neck.
- **F** If the yoke is less than 2” from your C7 vertebra, try on a smaller pack. If the yoke is more than 2” from your C7 vertebra, try on a larger pack.

### HARNESS FIT
- The harness straps should wrap fully around your shoulders with no gaps between the pack and back. The padded part of the harness straps should end 1”/2.5cm- 2”/5cm below the armpits and the sternum strap adjusted to approximately 2”/5cm below the collarbone.

### WOMEN’S SPECIFIC FIT
- The pack shape is narrower and deeper allowing greater freedom of movement and increasing stabilization by lowering the position of the load to a woman’s center of gravity.
- The shoulder harness is designed with different curves to create an anatomical fit for a woman’s neck, shoulders and chest.
- Women’s hips are conically shaped with a larger difference between the waist and hip measurements. The hipbelts are shaped and angled to accommodate this difference which allows a more comfortable load transfer and support.
FEATURE DETAILS

BELLOWED FRONT FABRIC POCKET FOR STASHING GEAR
60L / 45L
Front fabric pocket stores gear you need quick access to, or holds wet gear to dry.

FIXED TOP LID
60L / 45L
Fixed top lid features a zippered compartment with key clip for storing and organizing smaller items.

DUAL ACCESS FABRIC SIDE POCKETS WITH INSIDEOUT™ COMPRESSION CORD
60L / 45L
Dual access side fabric pockets store smaller items and provide access when wearing the pack. Items can be inserted from the top or side.

TWO REMOVABLE SIDE COMPRESSION CORDS
60L / 45L
Removable side compression cords reduce weight.

A Locate the webbing loop port at the base of the side fabric pocket and push/pull the knot through the opening, then untie the knot from the webbing loop.
B Unthread the cord from the three plastic side compression anchors and the upper ladder lock and store for safe keeping.

To replace the cord:
A Thread the cord through the upper ladder lock and three side compression anchors.
B Attach the cord to the webbing loop located inside the side fabric pocket with an overhand followthrough knot.

BELLOWED FRONT FABRIC POCKET FOR STASHING GEAR
60L / 45L
Front fabric pocket stores gear you need quick access to, or holds wet gear to dry.
FEATURE DETAILS

INTERNAL RESERVOIR SLEEVE
60L / 45L
Place reservoir inside sleeve to help ensure proper pack weight distribution. Clip reservoir to buckled loop to keep upright.

INTERNAL MAIN COMPARTMENT COMPRESSION STRAP
60L / 45L
Internal main compression strap keeps loads stable.

TOP LID CORD LOOP ATTACHMENT POINTS
60L / 45L
Top lid cord attachment points can be used to secure additional gear externally.
