FEATURE DETAILS / OZONE WHEELS

TOP LIQUIDS POCKET
28L / 22L / 18L
The liquids pocket is located at the top of the luggage piece. Easy zip access and location allow quick access to toiletry kit or other small items. Its bellowed design allows it to compress, giving volume to the main compartment. When fully utilized, the Ozone is sized to fit a variety of 1L/1qt wash bags or Osprey’s Airporter travel duffel and cover.

TOP AND SIDE LOW PROFILE CARRY HANDLES
28L / 22L / 18L
There are low profile handles on the top and sides of the Ozone, making it easy to grab, pull and carry. With heavy duty fabric on top and soft padded material underneath, the handles on the top and along both side panels of the pack are easy to grab and comfortable to use. The fourth handle is molded directly into the front side of the HighRoad™ Chassis to serve as both a handle and front bumper.

LARGE ACCESS MAIN COMPARTMENT
28L / 22L / 18L
The large access main compartment utilizes a full front panel U-zip opening that allows quick complete access to gear. The stiff zipper path provides structure to keep the main compartment wide open while packing or unpacking gear. The bright internal liner makes it easy to find small items that could otherwise be hard to find in a large compartment. To help organize small items, it would be best to utilize the internal zippered pockets.

INTERNAL COMPRESSION STRAPS
28L / 22L / 18L
Loads can be fully maximized and stabilized inside the main compartment of the Ozone. The internal compression straps connect directly to the backpanel to cinch down gear.

A When packing, unbuckle the internal compression straps, loosen all the way, and have them hang out of the way along the sides of the pack.
B Once packed, buckle the straps and evenly cinch them to compress clothes and gear.

MAIN COMPARTMENT LOCKABLE ZIPS
28L / 22L / 18L
The main compartment lockable zipper is designed to work with TSA-approved travel locks to protect gear from theft. The burly, anti-theft zipper coil prevents the bag from being broken open and prevents access.

A To protect gear, zip together the main compartment, matching the two eyelets built into the double zippers.
B Connect the two zippers with travel lock.
FEATURE DETAILS / OZONE WHEELS

FRONT PANEL ORGANIZATION POCKET
28L / 22L / 18L
The front panel organization pocket is part of what makes the Ozone stand apart in the lightweight luggage market. Hidden inside is a zippered pocket to store travel documents, a wallet, or a passport. Two large mesh pockets inside are perfect to hold travel snacks, headphones, or other small items. It also includes a key clip to keep keys secured while traveling.

HIGHROAD LT™ CHASSIS
28L / 22L / 18L
A groundbreaking original design by Osprey Packs, The HighRoad LT™ Chassis uses lightweight aluminum tubing for the frame and base of the Ozone Series. Large wheels with sealed bearings and a high clearance, curved, molded base allow the wheels to roll over rough terrain. Combined with the comfortable single bar handle, we created one of the lightest weight wheeled luggage chassis on the market.

ZIPPERED REAR POCKET
28L / 22L / 18L
The large zippered rear panel pocket is another additional storage option for items such as magazines, dirty laundry, a jacket or sandals. Located in the cavity of the HighRoad LT™ Chassis, it gives the pocket’s contents protection from items in the main compartment. A small mesh drain hole is included at the bottom of this pocket to let moisture (and any potential smells) escape.
OVERVIEW / OZONE CONVERTIBLE

SHARED FEATURES EXTERIOR
1. Easy access top zippered pocket for liquids and valuables
2. Large zip panel access to main compartment with lockable zippers
3. Detachable zip-off Ozone day pack for day trip adventures
4. HighRoad LT™ Chassis
5. Low profile carry handles on top and side
6. Large zippered rear panel pocket with ID card window
7. Convertible suspension with padded backpanel, hipbelt and adjustable harness

SHARED FEATURES INTERIOR
* Dual internal compression straps
* Full length internal mesh side pocket
* Full length internal fabric side pocket
* Large internal zippered mesh front panel pocket

UNIQUE FEATURES
+ External dual upper side compression straps
FEATURE DETAILS / OZONE CONVERTIBLE

TOP LIQUIDS POCKET
28L / 22L
The top liquids pocket is conveniently located at the top of the luggage piece. Easy zip access and location allow quick access to your toiletry kit or other small items—especially when passing through airport security. Its bellowed design allows it to compress, giving volume to the main compartment. When fully utilized, the Ozone is sized to fit a variety of 1L/1qt wash bags or our Airporter travel duffel and cover.

TOP AND SIDES LOW PROFILE CARRY HANDLES
28L / 22L
With low profile handles on three sides, the Ozone is easy to grab, pull, and carry in any situation. With heavy-duty webbing, these ultra-light bags feature handles that are soft and comfortable to grab on the top and along the left side panel of the pack. The third handle is bent directly into the front side of the aluminum HighRoad LT™ Chassis to serve as both a handle and front bumper.

LARGE ACCESS MAIN COMPARTMENT
28L / 22L
The large access main compartment utilizes a full front panel U-zip opening that allows quick complete access to gear. The stiff zipper path provides structure to keep the main compartment wide open while packing or unpacking gear. The bright internal liner makes it easy to find small items that could otherwise be hard to find in a large compartment. To help organize small items, it would be best to utilize the internal zippered pockets.

INTERNAL COMPRESSION STRAPS
28L / 22L
Loads can be fully maximized and stabilized inside the main compartment of the Ozone. The internal compression straps connect directly to the backpanel to cinch down gear.

LOCKABLE ZIPS FOR MAIN COMPARTMENT
28L / 22L
The main compartment lockable zipper is designed to work with TSA-approved travel locks to protect gear from theft. The burly, anti-theft zipper coil prevents the bag from being broken open and prevents access.

A To protect gear, zip together the main compartment, matching the two eyelets built into the double zippers.
B Connect the two zippers with travel lock.

A When packing, unbuckle the internal compression straps, loosen them all the way and have them hang out of the way along the sides of the pack.
B Once packed, buckle the straps and evenly cinch them to compress clothes and gear.
A  Unbuckle the two red buckles that attach the hipbelt and lumbar, hidden behind the backpanel.
B  Then, break the hook and loop closure of the harness to remove it and the hipbelt together.
C  With the suspension removed, the rear backpanel can now store items such as magazines, dirty laundry, a jacket or sandals.

ZIPPERED REAR POCKET
28L / 22L
The large zippered rear panel pocket contains removable suspension that can also be an additional storage pocket.

HIGHROAD LT™ CHASSIS
28L / 22L
A groundbreaking original design by Osprey Packs, The HighRoad LT™ Chassis uses lightweight aluminum tubing for the frame and base of the Ozone Series. Large wheels with sealed bearings, and a high clearance, curved, molded base allow the wheels to roll over rough terrain. Combined with the comfortable single bar handle, we created one of the lightest weight wheeled luggage chassis on the market.

OZONE CONVERTIBLE MAIN BODY
28L / 22L
The convertible harness, hipbelt and suspension of the main luggage piece can be deployed to carry Ozone Convertible where wheels can’t go. The ventilated harness and hipbelt, with mesh-covered, die cut foam, make carrying luggage comfortable and easy. With an adjustable torso, and tensioned, spacer mesh backpanel, this pack can be effectively carried over long distances and varied terrain.

A  Unzip the backpanel and deploy the harness and hipbelt.
B  Tuck the rear panel flap behind the hipbelt lumbar.
C  Buckle the two male buckles extending below the hipbelt to the two female buckles located at the base of the luggage piece. This tensions the back panel. The hipbelt should fit right over the iliac crest, or the side of your hipbone directly under your armpit, with the padding above and half below.
D  Adjust the torso so that the harness yoke fits 2” below your C7 vertebra (the bone that sticks out at the base of your neck when you put your head down) with the hipbelt sitting correctly on your iliac crest. To adjust the harness yoke up or down, simply break the hook and loop to move in the preferred position, and relock the hook and loop.
E  To protect and store the hipbelt and harness when not in use, unbuckle the buckles at the base of the luggage piece, tuck away the harness and hipbelt, and zip up the rear panel.
**FEATURE DETAILS**

**OZONE CONVERTIBLE**

**DETACHABLE OZONE CONVERTIBLE DAY**  
28L / 22L  
For quick escapes and adventures, the detachable daypack can be removed and filled with the gear you need for the day.

**OZONE CONVERTIBLE DAY STRETCH MESH POCKETS**  
28L / 22L  
The daypack dual stretch mesh pockets allow quick access and storage for a small water bottle, a camera, snacks, sunscreen or other items that are needed often while traveling.

**OZONE CONVERTIBLE DAY VENTILATED BACKPanel AND HArNESS**  
28L / 22L  
The ventilated daypack backpanel and harness are built to be comfortable in a variety of climates all around the world. The die cut foam harness allows for a natural stretch, a comfortable fit and airflow for breathability in hot climates. The die cut foam backpanel allows ventilation, but stays close to the back for a lightweight, comfortable fit.

**OZONE CONVERTIBLE DAY HEAT EMBOSSED POCKET**  
28L / 22L  
The scratch-free, heat embossed pocket on top of the pack allows quick access to your sunglasses or electronics. It is made and patterned to prevent damage to sensitive items, while remaining easier to clean than a fleece liner.

**OZONE CONVERTIBLE DAY MAIN COMPARTMENT**  
28L / 22L  
The daypack main compartment has storage for items such as a laptop, tablet, and extra clothes or food. This offers great additional organization when used with the luggage piece or to carry what you need for the day when the daypack is removed and used separately.

**OZONE CONVERTIBLE DAY ORGANIZATIONAL POCKETS**  
28L / 22L  
The daypack front organization panel pocket provides organization for small travel or work items. A zippered pocket is hidden inside to keep items safe and secure.

A First, unthread the toggles at the base of the pack from the cord loops.  
B Unzip the pack from the main body of the luggage piece.  
C The daypack is now ready to be carried separate from the main luggage.  
D To reinstall, re-zip and re-toggle the pack. The toggles add extra security against theft or zipper failure.
**OVERVIEW / OZONE TRAVEL PACKS**

**SHARED FEATURES EXTERIOR**

**FEATURE DETAILS / OZONE TRAVEL PACKS**

**DIRECT ACCESS TABLET SLEEVE**

For most travelers, their tablet is their go-to electronic device for accessing information, watching a movie, or checking email. The direct access tablet sleeve not only offers easy access while traveling—it also uses a heat embossed, scratch-free fabric to keep the tablet protected and secure.

**STRETCH MESH POCKET**

The daypack dual stretch mesh pockets allow quick access and storage for a small water bottle, camera, snacks, sunscreen or other items that are needed often while traveling.

**LARGE ACCESS MAIN COMPARTMENT**

The unique large panel load main compartment creates quick access to a laptop and tablet, while maximizing the packing capability of the rest of the compartment. When unzipped, the padded laptop sleeve and zippered tablet sleeve are easy to grab when passing through airport security, or on the plane. The deep main compartment allows you to store exactly what you need for the day or week, while keeping items organized and accessible.

**CARRY HANDLES**

Low profile handles on the top of the Ozone daypacks, and the bottom of the Ozone 46L Travel Pack make these ultra-light bags easy to grab, pull and carry in any situation. The heavy-duty webbing handles make these ultra-light bags soft and comfortable to grab.

**MAIN COMPARTMENT LOCKABLE ZIPS**

The main compartment lockable zipper is designed to work with TSA-approved travel locks to protect gear from theft. This feature protects laptop, tablet and other gear in the main compartment. The burly, anti-theft zipper coil prevents the bag from being broken open, and prevents access.

**FRONT PANEL ORGANIZATION POCKET**

The front panel pocket has organization for small travel or work items. Hidden inside is a zippered pocket to keep items safe and secure. A key clip is also included to secure keys throughout traveling. Other organizational features include a mesh pocket and sleeves for pens or other small items.

---

**A** To protect gear, zip together the main compartment, matching the two eyelets built into the double zippers.

**B** Connect the two zippers with travel lock.
FEATURE DETAILS / OZONE TRAVEL PACKS

OZONE HANDLE-IT™
46L / 35L / 24L / COURIER
Free up shoulders and back by placing the Ozone daypack or courier on luggage with the Handle-It™ slot to securely attach it to the wheeled luggage handle. The Handle-It™ slot is built into the harness of the daypacks and into a flip-up tab on the back panel of the courier. It easily slips over any Osprey luggage handle systems.

VENTILATED HARNESS, HIPBELT AND BACK PANEL
46L / 35L / 24L
The ventilated daypack harness and back panel are built to be comfortable in a variety of climates. The die cut foam harness allows for natural stretch, a comfortable fit, and airflow for breathability in hot climates. The die cut foam back panel allows ventilation, but stays close to the back for a lightweight, comfortable fit.

STOWAWAY HARNESS AND HIP BELT
46L
The Ozone 46 Travel Pack stowaway hip belt and harness is perfect to protect and store the components when being checked in at the airport, or toed all over town.

A To store the harness, unbuckle the lower harness straps and tuck it into the zipper pocket at the top of the harness.
B The hip belt tucks into two sleeves where the hip belt connects into the back panel.

LOWER COMPARTMENT
46L
The Ozone 46 Travel Pack large zippered lower compartment is perfect for storing items such as shoes or camera gear. The bellowed fabric divider collapses for better packing efficiency.
PACK / RESERVOIR MAINTENANCE

Your Osprey pack is an extremely durable product and is built for years of use. However, some basic pack maintenance will help ensure your pack lasts a lifetime.

**OSPREY PACKS**

**STANDARD MAINTENANCE**
- After each trip be sure to clean out your pack thoroughly.
- Clean the zippers regularly using mild soap, warm water and soft brush. This will help keep them in proper working condition.
- If your pack is wet, hang it to dry out of direct sunlight.
- Loosen all the straps.
- Wash your pack if dirt, sweat, salt and stains have worked their way into fabrics, webbing or mesh.

(Do not immerse travel packs in water with our HighRoad™ Wheeled Chassis.)

**WASHING YOUR PACK**

A Empty the pack including any food, dirt or spilled contents.
B If your pack has a removable harness and hipbelt, remove them from the pack body.
C Do NOT wash your pack in a washing machine. Clean your pack and components in a bathtub or large sink using a mild detergent and warm water.
D Agitate the pack gently. Scrub the inside and outside of all compartments including the pockets with a soft brush.
E Clean the zippers using a mild soap, warm water and a soft brush. Flush water and soap through the buckles. Keeping dirt and debris out of the zippers and buckles will help keep them in proper working condition.
F Drain the dirty water from the bathtub or sink and refill with cool clean non-soapy water. Rinse the pack thoroughly. Repeat this step as necessary.
G Hang your pack to dry outside or in a well ventilated area, out of direct sunlight.

**WHEELED TRAVEL LUGGAGE**

(Do not immerse travel packs in water with our HighRoad™ Wheeled Chassis.)

A After each trip, empty the pack including any food, dirt or spilled contents.
B If your pack has a removable harness and hipbelt, remove them from the pack body.
C Do NOT wash your pack in a washing machine. Clean your pack and components in a bathtub or large sink using a mild detergent and warm water.
D Agitate the pack gently. Scrub the inside and outside of all compartments including the pockets with a soft brush.
E Clean the zippers using a mild soap, warm water and a soft brush. Flush water and soap through the buckles. Keeping dirt and debris out of the zippers and buckles will help keep them in proper working condition.
F Clean the pack fabric by scrubbing stains and dirt with warm water, mild detergent and a soft brush.
G Hang your pack to dry outside or in a well ventilated area, out of direct sunlight.

**RECOMMENDED CLEANING PRODUCTS**

Osprey recommends Nikwax® products for pack care. Be sure to read label directions carefully before applying any product to your pack.

Tech Wash® - Use this with warm water for washing and cleaning your packs or luggage.

Tent & Gear Solar Proof® - Use this spray-on product to protect your packs from UV exposure and to improve water repellency.

For complete instructions on cleaning your Osprey pack, visit ospreypacks.com/PackTech/PackCare.

**OSPREY RESERVOIRS**

**RESERVOIR STANDARD MAINTENANCE**
- Our reservoir’s anti-microbial formula prevents most mold and bacteria growth.
- Rinse out your reservoir after each use should keep your reservoir fresh, especially when using sugary drink mixes.
- Periodically use Osprey’s Hydraulics™ Cleaning Tablets to clean your reservoir.
- Iodine or other purifying tablets used in your reservoir will not affect the quality of your reservoir. However these tablets may stain the reservoir over time.
- Freezing your reservoir will not affect the quality of the reservoir. However if the reservoir is filled with water, be aware that water expands when it freezes and can damage your reservoir if it is overfilled.
- Do NOT pour boiling water into the reservoir. This can damage the reservoir and will void your warranty.
- Watch “Cleaning an Osprey Hydraulics™ Reservoir” video on Osprey Packs YouTube® page.

**CLEANING YOUR RESERVOIR (WITH OSPREY HYDRAULICS™ CLEANING TABLETS)**

A Fill reservoir with warm water. Do not use bleach or boiling water.
B Add one cleaning tablet to reservoir and close the cap.
C Let tablet dissolve for 5 minutes with the reservoir laying on its back.
D Shake the reservoir for 30 seconds to mix and spread the solution.
E Pinch the bite valve and squeeze the reservoir to remove air and fill the reservoir hose and bite valve with solution.
F Let the reservoir sit for 15 minutes and then pour out solution.
G Rinse the reservoir and tube with clean cool water.
H Hang your reservoir to dry in a well ventilated area.

**DEEP CLEANING YOUR RESERVOIR (WITH OSPREY HYDRAULICS™ CLEANING KIT)**

1 Rinse out the reservoir and fill it with warm water and a mild dish detergent. Do not use bleach or boiling water.
2 With the large cleaning brush from Osprey’s Hydraulics™ Cleaning Kit scrub the interior of the reservoir.
3 Remove the hose from the reservoir and the bite valve from the hose and use the small brush from Osprey’s Hydraulics™ Cleaning Kit to scrub the interior of the hose.
4 Remove the silicone bite valve cover and clean it and the bite valve with warm soapy water.
5 Rinse the interior and exterior of the reservoir, hose and bite valve parts with cool clean water.
6 Let the hose and bite valve dry in a well-ventilated area.
7 Insert Osprey’s Hydraulics™ Cleaning Kit drying rack into the reservoir and hang to dry in a well ventilated area.

For complete instructions on cleaning your Osprey reservoir watch, “Cleaning an Osprey Hydraulics™ Reservoir” at youtube.com/ospreypacks.
