SIZING / FIT

HOW TO MEASURE YOUR BACK FOR YOUR PACK

1 FIND ILIAC CREST (Top of hip bone)
2 ON BACK OF NECK, FIND C7 VERTEBRAE Touch your chin to your chest and feel for the large protruding bone at the base of your neck.
3 MEASURE FROM C7 VERTEBRAE TO THE ILIAC CREST TO DETERMINE TORSO LENGTH

ROOK - MEN’S
TORSO  O/S 17-22” / 43-58 cm
HIPBELT  O/S 29-51” / 74-130 cm

RENN - WOMEN’S
TORSO  O/S 14-19” / 36-48 cm
HIPBELT  O/S 27-49” / 70-125 cm

WOMEN’S-SPECIFIC FIT
• Shorter torso length
• Narrower, shorter harness with curves designed to accommodate most women’s necks, shoulders and chests
• A hipbelt designed to wrap naturally around the curves of a woman’s hips, offering better load stabilization and support
**FIT**

1. **POSITION THE PACK**
   - Completely loosen the pack’s hipbelt, harness and load-lifter straps.
   - Load the pack with 10–20 lbs/4–9 kg of gear.
   - Put on the pack and make sure that the hipbelt is centred and rests over the hipbone. The hipbelt padding should sit halfway above and below the hipbone.

2. **BUCKLE HIPBELT**
   - Buckle and evenly tighten the hipbelt using Osprey’s cross body ErgoPull.
   - The padding of the hipbelt should wrap around the hips with approximately 1–3” / 2.5–6 cm of webbing between the buckle and the hipbelt when tightened.

3. **TIGHTEN HARNESS**
   - Tighten the shoulder harness straps to tension by pulling them down and back.

4. **TIGHTEN LOAD LIFTERS**
   - Tighten the load lifters to tension by pulling them up and forward. This will pull the pack close to body to help stabilize the load.

5. **ADJUST HARNESS**
   - The harness straps should wrap fully around the shoulders with no gaps between the pack and back.
   - The padded part of the harness straps should end 1–2” / 2.5–5 cm below the armpit. And the harness should have 1–2” / 2.5–5 cm of webbing remaining.

6. **ADJUSTABLE HARNESS (TORSO LENGTH)**
   - M - 65L / 50L
   - W - 65L / 50L
   1. Identify the harness plugs located in one of the four sizing loops on the back panel.
   2. Grab the plug’s pull loop with thumb and forefinger and pull the harness’s LightWire extension out and to the sides of the pack. This releases the harness and allows it to slide up and down.
   3. Slide the harness up or down along the LightWire rails to the appropriate torso length.
   4. There are two load-lifter ladder lock options. Correspond the lower two or upper two backpanel settings to the lower or upper load-lifter ladder lock.

7. **STERNUM STRAP**
   - Adjust the sternum strap to approximately 2”/5 cm below the collarbone; buckle and tighten to tension.
