WOMEN’S SPECIFIC FIT

+ The unique suspended mesh located on the shoulders, backpanel, lumbar and hipbelt contour to a wide variety of body shapes and sizes to create a custom fit to your body.
+ The pack shape is narrower and deeper, allowing greater freedom of movement and increases stabilization by lowering the position of the load to a woman’s center of gravity.
+ The shoulder harness is designed with different curves to create an anatomical fit for a woman’s neck, shoulders and chest.
+ Women’s hips are conically shaped with a larger difference between the waist and hip measurements. The hipbelts are shaped and angled to accommodate this difference, which allows a more comfortable load transfer and support.

HARNESS FIT

The harness straps should wrap fully around your shoulders with no gaps between the pack and your back. The padded part of the harness straps should end 1”/2.5 cm - 2”/5 cm below the armpits and the sternum strap adjusted to approximately 2”/5 cm below the collarbone.
FEATURE DETAILS

ADJUSTABLE HARNESS
50L / 36L / 34L / 24L
To adjust for various torso lengths loosen the load lifter straps at the top of the harness, slide hand between backpanel and harness to release hook and loop attachment and slide harness into position using arrows to guide. Firmly press on backpanel to reengage hook and loop attachment.

INTERNAL RESERVOIR SLEEVE
50L / 36L / 34L / 24L
Place reservoir inside sleeve to help ensure proper pack weight distribution. Clip reservoir to buckled loop to keep upright.

INTEGRATED RAINCOVER
50L / 36L / 34L / 24L
The integrated, removable raincover provides protection in adverse weather conditions.
A. Locate the raincover icon near the base of the pack and unzip the raincover compartment.
B. Pull the raincover from the compartment and place over the top and bottom of pack using the peripheral elastic to hold it in place.

Note: To prevent mildew allow the raincover to dry entirely before storing.
